

NURSING AIDES, ORDERLIES, and ATTENDANTS provide general care to patients in hospitals, nursing homes, residential care facilities and other medical health settings under the supervision of nursing and medical staff. Nursing Aides may also be called nurse assistants, certified nursing assistants, or hospital attendants. Routine tasks include taking and recording patient's temperature, pulse, respiration rate, and blood pressure, measuring food and liquid intake and output; and reporting changes to the medical staff. They also answer patient calls for assistance, take messages, serve meals, make beds, and assist patients in bathing, dressing, and personal hygiene.
